

Healthy Kansas Minute Radio Interview – Colorectal Cancer Awareness Month

I'm Patrice O'Hara, the Cancer Program Manager with the Kansas Department of Health and Environment and this is the Healthy Kansas Minute.

March is Colorectal Cancer Awareness Month. Colorectal cancer is the second leading cancer killer in Kansas claiming the lives of more than 1,500 people each year.

It is preventable, easily detected, and can be cured if found early and treated.

Colorectal cancer screening is recommended for people over 50 and those with a family history of the disease.
